

2011

Epi Seminar Series

“A medical oncologist’s perception of cancer prevention in 2011”

Robert O. Dillman, M.D., F.A.C.P.

Grace E. Hoag Endowed Chair, Executive Medical Director, Hoag Institute for Research and Education, Hoag Cancer Institute, and Clinical Professor of Medicine, UC Irvine

Robert O. Dillman’s prior training and experience included a BA from Stanford, MD and internal medicine residency and chief residency at Baylor College of Medicine, and hematology and oncology fellowship at the University of California San Diego (UCSD). He is board certified in internal medicine, medical oncology, and hematology. Before coming to Hoag, Dr. Dillman was Assistant Director of the UCSD Cancer Center and Chief of Hematology/Oncology at the San Diego VA Medical Center, then Director of Experimental Clinical Oncology and Associate Director of the Ida M. Green Cancer Center of Scripps Clinic and Research Foundation in La Jolla, California. Since coming to Orange County in 1989 he has been a Clinical Professor of Medicine at UC Irvine. Dr. Dillman has authored or co-authored more than 270 scientific articles, reviews, book chapters, and monographs. He is recognized internationally for his work in lung cancer and cancer biotherapy, including monoclonal antibodies, interleukin-2, adoptive cellular therapy and autologous cancer cell vaccines. During his tenure as Medical Director of Hoag Cancer Center, the five-year relative survival rate for Hoag patients with invasive cancer has improved from 58 percent to 76 percent, and improved much more rapidly than has occurred nationally.

Friday, 12:30 – 2:00 pm

November 4, 2011

Irvine Hall Conference Center, Room 106, UC Irvine Campus
(w/ live telecast to UCI-MC Medical Library)

*Presented by
Epidemiology
Doctoral Students*

*Sponsored by the
Department of
Epidemiology
and the
Genetic Epidemiology
Research Institute.*
